Project Objective

We aim to **facilitate the transition to low-carbon districts** by improving regional development policies and programmes in the areas of:

- building renovation and construction of energy efficient buildings
- creation and renovation of district heating
- other urban renovation actions

Project Outputs

- Method Guide
- Diagnosis reports of the regional building, district heating and urban renovation sectors
- Good Practice Guide
- Policy Road Map
- Regional Policy Briefs
- Regional Action Plans with recommendations for integration into RIS3

Project Outputs

- Method Guide
- Diagnosis reports of the regional building, district heating and urban renovation sectors
- Good Practice Guide
- Policy Road Map
- Regional Policy Briefs
- Regional Action Plans with recommendations for integration into RIS3

Good Practices

Spain:

Urban regeneration

LOURDES RENOVE

efidistrict

Good Practices

Spain:

Nearly zero-energy buildings

Good Practices

Italy:

Implementation of energy efficiency and seismic prevention interventions of public buildings - Marche region ERDF ROP 2014-2020

Good Practices

Italy:

Protocollo ITACA - building a culture of change towards the environmental sustainability in construction.

Good Practices

Sweden:

READY Project

Resource Efficient cities implementing ADvanced smart citY solutions (READY)

The project aimed at testing innovative solutions when renovating residential and office buildings.

Good Practices

Sweden:

Växjö City hall

Växjö City Hall and Central Station is a potentially zero-carbon timber building.

This project shows the possibility of combining renewable and local materials with advance and energy efficient technologies to not only improve indoor environment but also reduce energy consumption, cost, and environmental impacts.

Good Practices

Czech Republic:

Uherské Hradiště hospital

Complex of 7 investment projects including construction on two new low energetic buildings, refurbishment works, boiler room and pipelines reconstruction and PV installations.

Good Practices

Czech Republic:

Brumov-Bylnice municipality

Designing optimal variation of district heating

Good Practices

Croatia:

Major project of reconstruction of DH system in the City of Zagreb.

Good Practices

Croatia:

Connecting of disrupted DH system into one and integration of RES

Project work plan

LC Districts
Interreg Europe

Phase 1 (Aug 19 – Jul 21)

- Semesters 1-4: Interregional learning
- Exchange of experience: kick-off meeting, study visits in partners‘ regions, regional dissemination events, stakeholder seminars
- Publication of LC Districts Method Guide, Good Practices Guide and Policy Road Map

Phase 2 (Aug 21 – Jul 22)

- Semesters 5-6: Evaluation and Monitoring
- Implementation of action plans
- Contacting the stakeholders
- Discussing results, final progress report
- Final dissemination event
