

European Week of Regions and Cities

Sustainable development strategies – Drivers for coherence and competitiveness of regional policies

All the regions in this partnership have created sustainable development strategies focusing on developing cross-departmental collaboration on one shared objective: creating a sustainable future for our regions. This workshop is an opportunity to share experiences in developing, implementing and monitoring strategies, and to investigate the different approaches. This discussion will include a range of topics, such as innovative participatory pathways and localising the UN Agenda 2030 SDGs.
